XII	Plan and section of the Anwa temple, Aurangabād
XIII	Coins from mints not represented in the cabinets of the Lahore or Indian Museums

The mosque is situated within an extensive enclosure which originally had a large garden, but no vestige of it remains now. Flights of steps on three sides—east, north and south—lead the visitor to an elevated terrace (6 ft. high) forming the courtyard of the mosque. The prayer-hall is four feet higher and consists of a double hall, the outer apartment having five arched openings and the inner only three, the place of the extreme openings towards north and south being occupied by two niches built in the pillar and lintel style. In the inner hall at the western end there is a prayer-niche in the form of a semi-decagon. Two lofty minarets (60 ft. high, approximately) flank the building at each side (north and south), and a number of small cupolas adorn the roof. The lower part of the mosque up to the roof is built of ashlar masonry, while the upper part is constructed of brick and lime, probably to carry cut-plaster decorations.

The chief feature of the building is its decorations, which have a strong Hindu influence in motif as well as in sentiment. To wit, the circular earthen pot which is so common a theme in Hindu architectural ornamentation is largely adopted here—(1) the shafts of the minarets rise from pot-shaped bases, (2) the façade is adorned with rows of black basalt pots cut in relief. Again, elephant-tusk brackets, which are absolutely Hindu in origin—the figure of an animal being repugnant to orthodox Muslim taste—have been used profusely in the mosque. Further, there are niches in the pillar and lintel style identical in form with niches in temples for the accommodation of images. Another Hindu feature, which may escape the notice of a casual visitor, is that just as the Hindu adorns the exterior surface of the temple with miniature *sikhāras* and other architectural detail, in the mosque also the tops of niches are adorned with miniature mosques and minarets.

In Hindu temples the decorations are often carried to excess and conventionality predominates over artistic sense. These peculiarities are superabundant in this mosque as also in other Qutb Shāhī monuments. The cut-plaster decorations are always excessive, and the number of small turrets and cupolas is unnecessarily large. In this mosque an extraordinary illustration of conventionality ruling artistic taste may be seen in the façade of the inner apartment of the hall, which is adorned with a *chhajja* supported on elephant-tusk brackets and is extremely incongruous there. Another instance of blind conventionality is the use of the trellis-work screens which probably originated from the Zenana palaces where they were quite appropriate. In this mosque the space between the minarets on the roof is filled with a trellis screen of exquisite workmanship. The *qālī* designs are extremely fine and artistic; but the screen has no archi-

TRANSLATION

In the reign of the well-wishing king, of heavenly court,
This building was completed through the efforts of the Shāikh, the leader
When I asked the Invisible Inspirer for a chronogram for the building, he said,
"This mosque was built by the order of the king 'Abdullah."

Written by Luṭfullāh al-Husainī at-Tabrizī, 1043 A.H. (1633 A.D.)

In calculating the numerical value of the letters the *lām* of 'Abdullāh which is double (مزداد) is counted twice.

*Proceedings of the Government of His Exalted Highness the Nizam
in the Judicial, Police and General Departments—(Archæology).*

No. $\frac{13}{7}$ of $\frac{1327\text{ F.}}{1916\text{ A.D.}}$

DATED, HYDERABAD (DECCAN), 24TH JUNE, 1918

SUBJECT

Review of the Report on the working of the Archæological Department for the year 1916-17 (1326 F.).

Personnel—Mr. Ghulam Yazdani was in charge of the Department, as Superintendent, throughout the year. The term of Mr. Yazdani's first appointment in the State expired on the 31st March, 1917 (27th Urdibihisht, 1326 F.), and at the request of His Exalted Highness' Government the Government of India sanctioned the extension of his services up to the 31st March, 1920. Following this extension the Department, which was inaugurated as a temporary measure, was made permanent.

The Superintendent was on privilege leave from the 6th May to the 21st July, 1917 (1st Tir to 15th Shahriwar, 1326 F.); but as he attended to important work during that period his absence involved no changes in the office staff.

2 *Tours*—The Superintendent's tour programme was curtailed owing to the epidemic of plague in some parts of the Dominions, and for the same reason last year's programme of operations was not fully carried out. But the restriction of his movements enabled the Superintendent to devote greater attention to the monuments in Warangal, which town was comparatively free from plague. He also made short visits to places in the Karinnagar and Aurangabad districts. In 1918 the Superintendent proposes to visit places which are off the railway in Medak, Nizamabad, Nanded and Parbhani, and to explore the Adilabad district which has not hitherto received much attention.

3 *Conservation*—The Superintendent carefully examined the group of temples at Palampet and took timely measures to protect them from further destruction. Mr. Yazdani thinks that this group "represents, perhaps, the brightest stars in the galaxy of the Mediæval Deccan temples." The great temple, which stands practically as a prototype for the smaller ones, is described with some detail in the Report. It represents what Fergusson called the Chalukyan style in the Deccan, and others, owing to a restricted knowledge of the extent of its prevalence, have named the Hoysala style of Mysore. The inscriptions in this temple are being edited by Dr. Barnett of the British Museum and will be published shortly.

Conservation work was carried out on other monuments, according to sanctioned estimates, in different parts of the Dominions. Mr. Yazdani is to submit

to Government a note of repairs to the temple at Uparpalli (Medieval Deccan style) in the Karimnagar district, which he examined in the course of the year

The report contains a detailed description of the Toli Masjid, in the City on the road to Golconda. The Superintendent has proposed certain measures for the conservation of this beautiful little monument of Qutb Shahi architecture

In the Aurangabad district the campaign of conservation started two years ago and has been carried on vigorously. Repairs to the Buddhist caves at Aurangabad and the Sivite temple at Anwa have been completed. Sir John Marshall, Kt., C I E., Director General of Archaeology in India, was consulted in the matter of the preservation of the Ajanta paintings, and he kindly suggested the names of three Italian experts of "Restauri"—M. Luigi Cavenaghi and Professors Tito Venturini and Fabrizio Lucarini. His Exalted Highness' Government have requested Sir John Marshall to engage, on their behalf, the services of one of the three experts for a winter's work in India

His Exalted Highness' Government have sanctioned a sum of B.G Rs 5,000 for the French savant, Monsieur Foucher, to write a monograph on the iconography of the Ajanta paintings. The monograph, which will be illustrated by the three-colour process, will be published by Government

The preservation of the Ellora caves has been taken in hand, Rs 8,357 having been spent during the year out of the first sanctioned estimate for O S Rs 30,019. A second estimate for Rs 40,000 (approximately) is before the Finance Department for sanction

4 *Excavation*—In November 1916 (Adhur 1326 F) the Superintendent visited the Madras Museum to study the markings on the prehistoric pottery collected in that Museum, and published a note on them in the *Journal* of the Hyderabad Archaeological Society. Mr Yazdani is led to the opinion that the great similarity in the markings points to a connection between the cairn-builders of South India and Sergi's Eur-African race

During the year Dr E. H. Hunt opened forty cairns in the environs of Hyderabad and was the fortunate discoverer of many interesting finds. Dr Hunt's pioneer work in this direction is a stimulus to other members of the Hyderabad Archaeological Society. One paper on the subject from his pen has appeared in the Society's *Journal*; doubtless others will follow

5 *Epigraphy*—Dr Barnett's monograph on the Ramappa and Uparpalli inscriptions will be issued shortly. His monograph on the Pakhal inscriptions will follow separately

Some minor Telugu inscriptions were copied at Medak and Bhamsa

During the year a complete set of rubbings was taken from the Golconda tombs and were published, with critical notes, in the 1915-16 volume of the *Epigraphia Indo-Moslemica*. Rubbings were also taken from several interesting Bahmani and Qutb Shahi inscriptions in the Medak Fort and Biloli Masjid. Another inscription—relating to Khafi Khan, the historian—was copied at Narsapur

6. *Numismatics* — Three hundred and ninety-seven coins were acquired as treasure trove. Seven of them were gold coins of the Vijayanagar dynasty, and there were three hundred and seventy-six Mughal silver coins, four Asaf Jahi silver coins and one Bahmani copper *dub* of the time of Humayun. Some of the Mughal coins are valuable as being from mints which are not represented in the cabinets of the Lahore or Indian Museums. These coins are for sale to public institutions or private collectors, or they will be exchanged with any institutions or Governments with whom His Exalted Highness' Government are on terms of exchange.

7. *Museum* — Since the Superintendent's report was written a Curator has been appointed for the Museum and is proceeding to British India to study the methods in the principal museums there.

8. *Hyderabad Archaeological Society* — The Society has instituted a gold medal to commemorate the memory of its Founder and first President, the late Sir Alexander Pinhey, K.C.S.I., C.I.E. Competition for the medal is open to the world and it will be awarded triennially for the best work on Deccan archaeology or history.

The Society is continuing its vigorous life under the new President, Sir Stuart Fraser, K.C.S.I., C.I.E.

9. *Expenditure*. — The expenditure on conservation during the year was O.S. Rs. 33,381 (B.G. Rs. 28,612). The full grant of O.S. Rs. 45,000 could not be utilized, as repairs to many buildings were not taken in hand until some time after the estimates had been sanctioned. The grants are allotted annually to be spent on conservation and all efforts should be made to avoid lapses. Conservation work was carried on at Ellora, Bidar, Ittagi, Hyderabad, Usmanabad, Aurangabad, Kariinnagar, Nanded, Gulbarga and Warangal.

The maintenance of the Department cost O.S. Rs. 17,181 (B.G. Rs. 14,726).

10. *Photographs and Drawings* — The Report has been illustrated by several of the photographs which were taken (72 in all) during the course of the year. Mr. Yazdani has selected, as type specimens, the following — Toli Masjid to represent the Qutb Shahi style; the Dichpalli and Nagānatha temples to illustrate the Mediaeval Deccan temple style, Shah Luṭṭullāh's tomb at Timurni for the Pathan style, and the Biloli Masjid (late Mughal period) as a mixture of Hindu, Mughal and Qutb Shahi styles of architecture.

Several large drawings and some maps and sketches were also prepared.

11. *Publications* — The text and translation of the Daulatabad plates of Jagadekamalla were published as No. 2 of the *Hyderabad Archaeological Series*. The Superintendent edited the 1913-14 volume of the *Epigraphia Indo-Moslemica* and Fasc. III of the Shah Jahan Nama (*Bibliotheca Indica*), and contributed a paper on the Palampet temples to the *Annual Report* of the Director General of Archaeology in India, an essay on Megalithic remains in the Deccan to the *Journal* of the Hyderabad Archaeological Society, and four papers on Islamic inscriptions to the *Epigraphia Indo-Moslemica* for 1915-16.

12. *Conclusion*. — Mr. Yazdani is to be congratulated on a successful year's work and on the production of a lucid and interesting report. He has kept in view the primary necessity of all archaeological work, namely, conservation, and

after giving this a fair share of attention has turned to the other aspect, exploration. On these two rests all true archæological progress.

His Exalted Highness' Government desire to express their appreciation of Mr Yazdani's services

(By order)

A HYDARI,

FROM

G YAZDANI, BScI, M A.,

Superintendent of Archaeology,

His Exalted Highness the Nizam's Dominions

TO

THE SECRETARY TO GOVERNMENT,

Judicial, Police and General Departments.

Dated Hyderabad (Dn), the 20th March, 1918

SIR,

I have the honour to submit herewith two copies of the Report on the working of the Archaeological Department for the year 1326 Fasli (1916-17 A.D)

A set of the photographs taken during the year under report has already been submitted to Government.

I have the honour to be,

Sir,

Your most obedient servant,

G YAZDANI,

Superintendent.

Annual Report of the Archæological Department, Hyderabad State

for

1916-17 A.D. (1326 F.).

On the 27th Urdibihisht (31st March, 1917) the term of the Superintendent's **Personnel.** services expired, but H. E. H.'s Government were pleased to ask the Government of India for the loan of his services for a further period of three years (i.e. up to 31st March, 1920), to which proposal the latter Government agreed. Following the extension of the Superintendent's services H. E. H.'s Government also made the Department, which had hitherto been in an experimental stage, permanent (*vide* Farmān dated 18th Ramāzān, 1335 A.H.).

The Superintendent was on privilege leave from the 1st Tir to the 15th Shahriwar (6th May to 21st July), but during this period work of an urgent nature was sent to him for disposal and there was no change in the personnel of the Department.

Owing to the prevalence of plague in the Dominions, it was not found **Tours.** practicable to carry out fully the programme published in last year's Report. However, the Superintendent was able to devote more time to the monuments in the Warangal district, which was more or less free from the epidemic, and also to pay short visits to several places in the Kaīmnagar and Aurangabād districts. The details of his tour are given in the diary published herewith (*vide* Appendix A).

Conservati
The temples at Palampet, which represent, perhaps, the brightest stars in the galaxy of mediæval Deccan temples, were carefully examined. This group has remained in obscurity owing to its unfavourable situation, being at some distance from the beaten track. On a platform (6' 4" high) of a cruciform plan stands the great temple. The plinth instead of being plain has been divided into foliating surfaces, which give a very pleasing effect to the general plan of the monument, and a space 10 ft wide all around the temple once formed a sort of promenade for devout pilgrims to view the long panels of impassioned figurine which adorn the exterior of the building. These carvings are of a most heterogeneous character, consisting of gods, goddesses, warriors, acrobats, musicians, dancing girls—in different and often obscene attitudes. A peculiarity of this building is the figure brackets which spring from the shoulder of the outer pillars and nominally support the ponderous *chhajja* beams. They are mere ornaments having no architectural purpose, and represent the intermediate stage between their earlier analogues at Sanchi and the later examples at Vijayanagar.

Annual Report, 1914-15, Pl V) Twelve of them consist of female figures which, though executed with great precision and accuracy, in general effect are not very pleasing to the eye. The fingers with long nails are exceptionally good, the poses of the body are also in some cases graceful, but the contour and the expression of the face are less successful and represent very poor art. The floral designs and figures of animals, on the other hand, are exceedingly fine, and one is tempted to think that the artists would not have failed so miserably in their delineation of the human form if their work had not been dominated by religious conventionalities.

The architecture of the building is lofty and grand and there is a decided sense of proportion and symmetry. The temple represents the full development of the mediæval Deccan style, which Fergusson has termed 'Chalukyan.' Mr Havell, in his enthusiastic analysis of symbolism in Indian architecture, speaks of this designation as 'delusive,' but the reasons which led Fergusson to adopt the term were, that the style developed its distinctive features during the reign of the Chalukya dynasty, and that it flourished in the country which was under their sway. Recently some scholars, dissatisfied with the terminology of Fergusson, have adopted equally indefinite terms, to wit, the temples of this type in the Mysore State have been called 'Hoysala,' which term, if applied to their analogues in Warangal, the seat of Kakatya kings, becomes equally perplexing.¹ If the influence of the Chalukya dynasty is not considered to be the main factor in the evolution of the style, the term 'Chalukyan' might be changed for 'Dekhani', which can be the only other appropriate name for the style.

The temple has several inscriptions which, as stated in the last year's Report, are being edited by Dr L. D. Barnett, Officer in charge of Oriental MSS, British Museum, for the *Hyderabad Archaeological Series*, and will be published shortly.

The other temples at Palampet although of smaller dimensions are built more or less in the same style, and in some cases are adorned with sculptures of surpassing beauty. For instance, the scene represented on a door panel of the temple at the western end of the Ramappa Lake Band, in which a sylvan deity standing in front is shown removing a thorn from her foot, is full of life and exhibits wonderful conception on the part of the artist (*Annual Report, 1915-16, Pl. IX b*).

These monuments though structurally in a fair state of preservation were embosomed in a thick growth of rank vegetation, and the interiors were extremely filthy. The Superintendent immediately after his inspection of the temples had them thoroughly cleared of grass and plants, and their plinths fully exposed and courtyards levelled and cleaned. These simple measures have not only saved the buildings from falling into rapid ruin, but have also considerably improved their general appearance.

In the Karimnagar District the Śivite temple at Uparpalli, a photograph of which was published in the last year's Report (Pl VIII a), was carefully examined

¹ The temple at Aundāh (Farbhani) bears a great resemblance to the famous temple at Halebid, and it would be entirely beside the point to name the architectural style of the former 'Hoysala' for it was built by the Yādava kings of Deogiri (Pls V-VII).

The temple consists of a square hall 27' each way, with shrines and ante-chambers at the northern, western and southern ends (see plan, Pl III b). The architecture of the temple is rather plain and the carvings also are simple. On the frieze of the northern shrine Ganeśa is represented dancing, apparently exultant at his victory over an evil spirit who is shown prostrated at Ganeśa's feet. Adjoining the temple in the southern direction there is an open pillared-hall with a shrine at its western end. The hall seems to have been built at a comparatively later period and the walls of the shrine are incomplete.

The roof of the temple needs attention and the pillars require resetting as they are not in plumb. Neat supports should be provided for the broken lintels. The courtyard should be levelled and cleaned, and grass and other vegetation thoroughly removed from the roof and walls of the building. A note embodying these measures will be submitted to Government shortly.

In the old city of Hyderabad, along the road which runs from the Purāna Pul to Golconda, some of the most beautiful monuments of the Qutb Shāhi period may be seen. They comprise shrines, mosques, baths, façades of old shops and dwelling houses, and as a large number of them have inscriptions they possess an additional interest for the antiquary. Mr A. Hydari, whose knowledge of and interest in the monuments of the Dominions are always of great assistance to the Department, drew the attention of the Superintendent to a mosque of this group called the Toli Masjid. The building is very typical of the general character of the Qutb Shāhi style and will be described here in some detail. It was built by Mūsa Khān,¹ a dignitary of the court of 'Abdullāh Qutb Shāh, who held the office of Mahaldar (Lord Chamberlain), but in time of war he played also the rôle of a general. An inscription carved in the prayer-niche gives 1082 A.H. (1671 A.D.) as the date of the erection of the building.²

¹ For Mūsa Khān see *Muntakhab-i-Jubāb*, Vol. II, p. 311, and *Epigraphia Indo-Moslemica*, 1913-14, pp. 51-3.

² The inscription reads thus —

لبن الملك اليوم لله واحد القهار
موسی خان بنا کرد این مسجدی
که شد مسعود در شاه محمد آله
بنای کرد مسجد بنام خدا
۱۰۸۲

TRANSLATION

For whom is the kingdom to-day? For God, the One, the All-powerful
Mūsa Khān built this mosque.

Which was completed in the reign of Shāh 'Abdullāh.

As a chronogram for the mosque this was announced (by the Invisible Speaker)

"Built the mosque in the name of God" 1081 A.H. = 1671 A.D.

In the courtyard of the mosque two inscribed slabs of black basalt (38" x 15") are placed on a grave. The inscription records the erection of a mosque in 1043 A.H. during the reign of 'Abdullāh Qutb Shāh. The mosque referred to in the inscription is apparently different from the Toli Masjid because the latter was erected in 1082 A.H.

The text of the inscription is as follows —

دست امام ابن نا از سعی شیعہ پشوا
در زمان شاه خیر الدین گردون نارگلا
شد بحکم شاه عبد الله این مسجد بنا
خواسم چون سال تاریخش زیور غیب گفت

۱۰۴۳

کتبه لطف الله الحسيني البهريري

(Continued)

tectural purpose there and shows bad taste. The impression made by such buildings overloaded with decoration is, if one may say so, like the impression left by the ostentatious and lavish display of personal adornment generally favoured by lowly persons suddenly become rich.

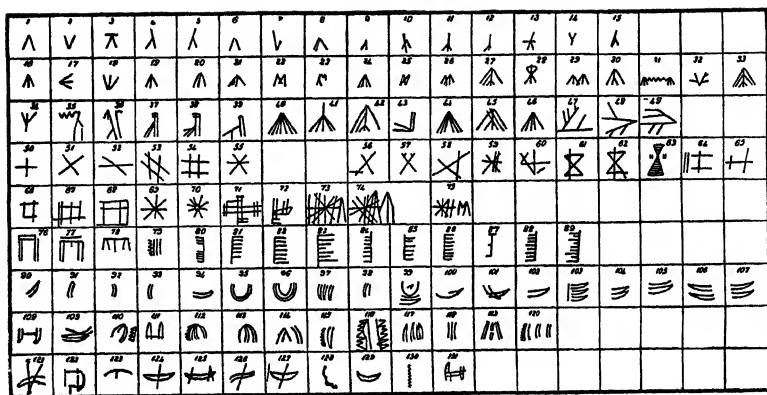

The Toli Masjid is in need of slight repairs, and the Superintendent intends to have the following measures executed in consultation with the Ecclesiastical Department:—(1) laying out a *muram* path (4 ft. broad) from the Golconda road to the flight of steps towards the north; (2) thorough repair of steps on all the three sides, (3) cleaning and repair of the terraced courtyard of the mosque, which will include the restoration and resetting of missing and loose marginal stones of the courtyard and the cistern for ablutions; (4) thorough repair to the curtain-wall behind the mosque (towards west); (5) the removal of small plants growing on the building; and (6) exposing the plinth of the building and laying out a *muram* path (4 ft. wide) all round, with a sharp slope outside so that the rain water may not sink into the foundation of the mosque.

In the Aurangabād district the campaign of conservation started two years ago has been carried on vigorously, and the repairs to the Buddhist caves at Aurangabād and to the Śivite temple at Anwā have nearly reached completion. In the matter of the preservation of the Ajanta paintings Sir John Marshall was kind enough to consult the three most notable experts of "restauri" in Italy—M. Luigi Cavenaghi, to whom is due the restoration of the "Cenacolo" of Leonardo de Vinci; (2) Prof. Tito Venturini, who restored the frescoes of the dome of Parma; and (3) Prof. Fabrizio Lucsrini, who was entrusted with the restoration of the paintings of some ancient tombs in Egypt. The process of preservation suggested by the specialists requires much expert knowledge and technical skill, so His Exalted Highness' Government have desired the Director General of Archæology kindly to engage the services of one of these artists and to bring him out for a winter to India.

In Ādhur (November) the Superintendent visited the Madras Museum where, Excavator not contrary to his expectations, he found a large quantity of *marked* pottery which he carefully studied, and a note on which has since been published in the *Journal* of the Hyderabad Archæological Society, No. 3, 1917. The most notable feature about the marks is that 75 per cent of them are identical with the alphabetic signs given by Evans in his comparative table showing the relation in Cretan and Aegean, Egypto-Libyan and Libyan writings.¹ An identity to such an extent cannot be accidental, and one is led to believe that the cairn-builder of Southern India had a distinct connection, either of stock or culture, with the Mediterranean race whom Sergi calls Eur-African. This view gains further

¹ In the paper published in the *J.H.A.S.* (No. 3, p. 61) the Superintendent pointed out the similarity of several of these marks to Brahmi letters. The similarity may stand for as much in significance as the resemblance of the Phœnician characters to the alphabetiform signs of European dolmens about which Seign (Mediterranean Race, p. 302) observes: "The characters called Phœnician are only a derived form of the alphabetiform signs that appeared during prehistoric times in Africa, in the Mediterranean, and in Western Europe. The Phœnicians, if indeed it was the Phœnicians who diffused the alphabet, only systematised signs that were already known and already indicated phonetic characters." Developing the argument, it is not unlikely that in India Brahmi may also be connected with the prehistoric marks current in the Deccan.

support from the uniformity in the shape and ornamentation of pottery, in the working of the stone, and in the ritual of the dead as well as in the curious mode of burial—in an extended position, in a doubled up and crouching position, and the burial of several bodies together as in family vaults¹ The “Dravidian problem” which has hitherto been a tangled knot is being studied in this light by some scholars, and Mr F J Richards, I C S., has collected some valuable information on this subject from an ethnographic point of view

During the year under review Dr E. H. Hunt opened altogether forty cairns at Maula ‘Ali, Bowenpalli (near Secunderabad) and Raigir. The most important finds among copper articles consist of a bell, a semi-circular trinket, probably an amulet, and a few ornamental head bands for the bull. Among iron relics he found at Bowenpalli a trident to which the effigy of a buffalo skeleton is attached. The find is interesting and indicates that the cairn wherein it was found is of a comparatively late date—of a period when the cairn-builder had imbibed some of the religious beliefs of the conquering Aryan stock. The trident with the buffalo skeleton apparently represent the victory of Śiva over the demon Mahiśa which is so favourite a theme in Hindu sculpture. It was evidently put into the cairn to avert the influence of evil spirits.

Dr E. H. Hunt has kindly promised to contribute a paper on his recent excavations to the *Journal* of the Hyderabad Archaeological Society.

Epigraphy.

No Hindu inscription of importance was discovered during the year although several minor Telugu epigraphs were copied at Medak and Bhainsa

Dr L. D. Barnett, to whom the editing of the Pākhal, Ramappa and Uparpalli inscriptions was entrusted (see last year’s Report, p. 10), has, in spite of the many other calls on his leisure, kindly completed his readings and translations of the last two inscriptions, and his scholarly monograph on them is now ready for publication (No 3, *Hyderabad Archaeological Series*). Dr. L. D. Barnett proposes to edit separately the inscription of Pākhal on account of its great length

In Muslim epigraphy the outstanding feature of the year’s work is the acquirement of a complete set of rubbings of the inscriptions in the Golconda tombs and their publication with critical notes in the *Epigraphia Indo-Moslemica*, 1915-16. Several of these inscriptions are of unique value for the chronology of the Qutb Shāhī period, because contemporary history in some cases offers very scanty information and scholars are likely to go astray. It was evidently due to these difficulties that Professor Jadu Nath Sarkar, whose reputation as an enthusiastic and careful student of Indian history is well established, was led by contemporary writings to fix 1086 A.H. as the date of ‘Abdullah Qutb Shāh’s

¹ In Southern India the mode of burial—in a doubled up position or in an extended position—varies to a large extent according to the availability of stone. In the districts where stone is plentiful the dead have been buried in stone cists in an extended position. On the other hand in places where stone is rare burial in a crouched position in dish-shaped clay coffins, or big earthen urns has been noticed. In some cases the burial of bone as bone has been noticed, which perhaps shows that bodies were first buried at a different place and later on shifted to a better resting place—a family vault, a husband or wife’s tomb, or a spiritual leader’s grotto. In some urns bones have been found in a calcined form, which indicate that “cremation”, the practice prevalent among the ruling Aryan stock, had occupied the place of “inhumation”. Such burials are apparently of a later date.

death, although the inscription on his tomb clearly shows that he died in 1083 A.H.¹

Besides the careful study of the epitaphs in the Golconda tombs the Superintendent has taken rubbings of several interesting Bahmani and Qutb Shāhi inscriptions in the Medak Fort and the Biloli mosque. Another inscription was copied at Narsāpur—32 miles north of Hyderabad, in the Pāigāh 'Ilaqa of the late Nawab Khurshīd Jāh, which shows that Khāfi Khān, the great historian, on perceiving the scarcity of water in the town, built a large well of sweet water in 1140 A.H. (1727 A.D.)

During the year three hundred and ninety-seven coins were acquired as treasure-trove finds. Below is a list showing the districts and localities from which they were received Numismat

<i>Class</i>	<i>District</i>	<i>Locality</i>
16 gold coins of the Vijayanagar dynasty	Karīmnnagar	Sirser.
188 silver coins of the Mughal emperors ..	Mahbūbnagar	Yalkacharlā.
187 " " " " " " ..	Do.	Pargi.
1 silver Mughal coin ..	Aurangabād	Anbar
4 silver coins of the Āsaf Jāhī dynasty ..	Nanded	Hadgāon.
1 copper <i>dub</i> of Humāyūn Bahmanī ..	Do.	Do.

Of the coins received from the Mahbūbnagar district many are valuable as belonging to mints not represented in the cabinets of either the Indian Museum or the Lahore Museum (Plate XIII). A classified catalogue of these coins is published as Appendix G of the Report. The last column gives the price of the coins which are for sale or can be offered gratis to those institutions or Governments with whom H. E. H.'s Government is on terms of exchange. The last date to apply for these coins is March 31st, 1919, when they will be distributed with due regard to the claims of each applicant.

In last year's Report it was noted that Government had sought the advice of several experts in the matter of selecting a suitable candidate for the post of Curator of the Hyderabad Museum. During the year several names were recommended by specialists, and the case is now before Government for final decision.² The new appointment of the Director of Industries, recently created by H. E. H.'s Government, it is hoped, will facilitate the initial equipment and subsequent development of the economic side of the Museum. Museum.

The most notable feature of the year's work is the institution of a medal in memory of the late Sir Alexander Pinhey, K.C.S.I., C.I.E., the founder and first President of the Society. The competition for the medal is open to scholars in any part of the world, and it will be awarded triennially for the best work on Deccan archaeology or history. Hyderabad
Archæolog
cal Society

During the year several interesting papers were read under the auspices of the Society, and a volume of the *Journal* (No. 3) comprising the Society's

¹ This question has been fully discussed in the *Journal* of the Hyderabad Archaeological Society, No. 3, 1917, pp. 80-82.

² Since writing the Report Mr. T. Streennias, Bar-at-Law, has been appointed Curator.

transactions was published. The number of ordinary members increased from fifty-five to eighty.

Publications. The publications issued by the Archaeological Department during the year are noted below :—

(1) *Annual Report, 1915-16 A.D. (1325 F.).*¹

(2) *The Daulatabad Plates of Jagadekamalla*, Hyderabad Archaeological Series, No. 2.

In addition, the Superintendent edited the *Journal* (No. 3) of the Hyderabad Archaeological Society, the *Epigraphia Indo-Moslemica*, 1913-14, and the *Shāh Jahān Nāmāh* (Fasc. III). The last work is being published under the auspices of the Asiatic Society of Bengal, and the Superintendent has been engaged for a considerable time in editing it, doing the work in pieces as opportunity offered.

The Superintendent, as usual, also contributed a detailed article this year on the temples of Palāmpet, to the *Annual Report* of the Director General of Archaeology, Part II; one essay on the "Megalithic Remains of the Deccan" to the *Journal* of the Hyderabad Archaeological Society, 1917; and four essays on Islamic inscriptions to the *Epigraphia Indo-Moslemica*, 1915-16.

Library. Fifty-six new books were added to the library of the Department, of which twenty-eight were purchased and the rest were received as presents. Among the purchased volumes there is a manuscript statistical account of the Deccan compiled in the reign of Muḥammad Shāh. It is written somewhat in the style of the modern gazetteers, and, besides giving a short history of important places, contains full statistical tables of the assessment of all the various districts and villages. The book seems to be identical to MS. No. 470 of the India Office Library (*Cf. Catalogue of Persian MSS.* by Éthe).

Photographs. Seventy-two photographs were taken during the year. A complete set of them has been submitted to Government. Several of the photographs have been reproduced in this Report to illustrate the main architectural features of the monuments of the Deccan. Students of Indian art and architecture have often complained against the scarcity of illustrative material,² and this Department since its institution has endeavoured to lessen the scarcity by publishing every year a certain number of plates illustrative of choice specimens of Deccan art. A complete list of the negatives is given in Appendix E.

Drawings. During the year seven large drawings and several maps and sketches were prepared. The titles, scales, etc., of the large drawings are given in Appendix F.

Expenditure on Conservation. The expenditure on the conservation of monuments in the Dominions amounted to O.S. Rs. 33,381-7-8 (B.G. Rs. 28,612-11-2). The total amount of the Government grant could not be spent fully, as repairs to many buildings were not taken in hand owing to the estimates not being sanctioned. Conservation work is now in progress at Ajanta, Bidar, Ittagi (Raichur) and several other places,

¹ It is unfortunate that the Urdu edition of the Report owing to the great delay made by the Government Press could not be issued in time.

² See *J.H.A.S.*, No. 1916, p. 132, and *History of Indian and Eastern Architecture* by Fergusson and Burgess, Vol. II, p. 280.

and it is hoped that the liberal grant of Government will be fully utilized in coming years. A detailed statement of the expenditure is given in Appendix C.

During the period under report a sum of O S Rs. 17,181-1-4 (B G. Rs 14,726-10-8) was spent on the maintenance of the Department. A detailed statement of the expenditure is given in Appendix B

Expendi
on the m
tenance
Departn

In Dai and Baihman (November and December) it is intended to visit those monuments in the Medak, Nizāmabād, Nanded and Parbhani districts which have not been examined yet owing to their distance from the railway line. Isfandār and Farwardīn (January and February) will be devoted to the exploration of the Āsifabād ('Ādilabād) district which has hitherto remained *terra incognita* to archaeologists, due to the difficulty of communication and density of jungle. Besides this, short visits according to emergency will be paid to places where conservation work is in progress.

Pinhey Memorial Medal.

The Hyderabad Archaeological Society, on the 21st April, 1916, decided that a Gold Medal be instituted to commemorate the memory of Sir Alexander Pinhey, K.C.S.I., C.I.E., the Founder and first President of the Society.

Regulations.

- (1) The 'Pinhey Memorial Gold Medal' shall be awarded triennially for the best work on Deccan Archaeology or History, in accordance with the subjoined conditions.
- (2) The competition shall be open to scholars in any part of the world.
- (3) Competitors shall submit a thesis on any subject chosen by themselves relating to Deccan Archaeology or History. The thesis should be an unpublished work, or, if published, it should not have been published more than two years before its submission for the Pinhey Medal.
- (4) Theses for the first competition will be received up to the end of October 1918, and subsequently in the October of every third year, i.e. in October 1921, 1924, and so on.
- (5) If the selected thesis is an unpublished work, the Society, at the recommendation of the Council, shall have the right to publish it in the Society's *Journal*.
- (6) If in the opinion of the Council none of the theses submitted in any year are of special value, the Medal shall not be awarded in that year.
- (7) If thesis is written in any language other than English, the competitor shall furnish an English translation thereof.
